

JIS C9606 SOILING⁺

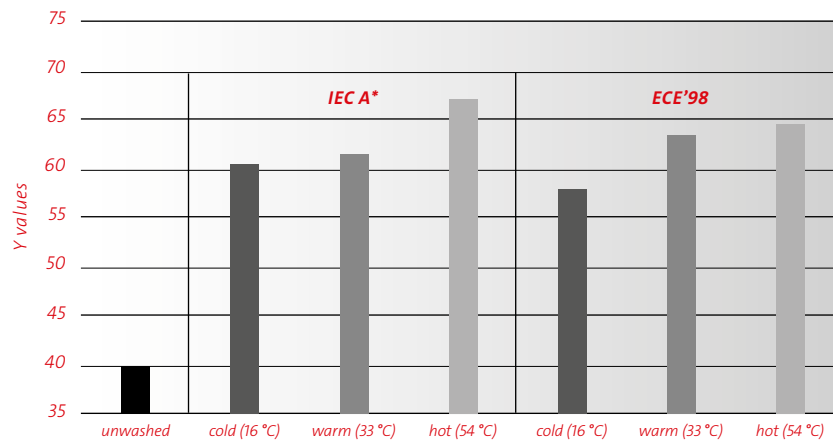

For Assessing the Efficiency of gentle Washing Processes up to 40 °C

This test fabric is soiled with a mixture of oily components and pigments. It is useable at low washing temperatures.

article 124/1
soiling on cotton

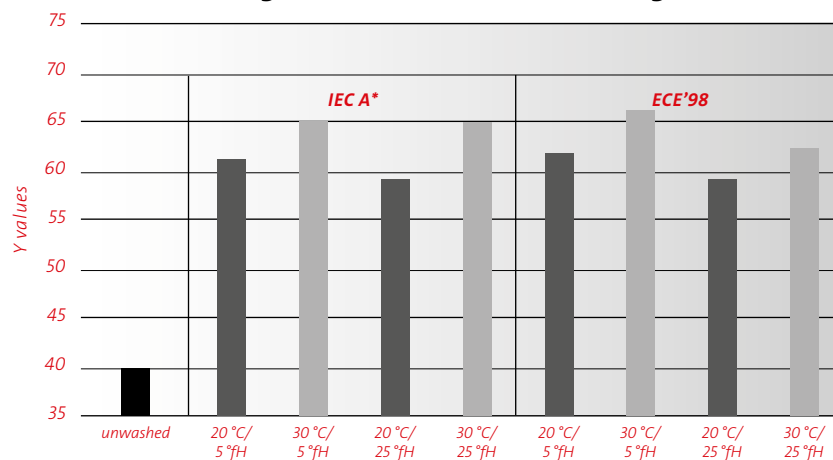

General washing behaviour on a VA washing machine

Washing liquor:
1.04 g ECE'98 (IEC A*
+0.27 g Perb. +0.04 g
TAED)/l Water hard-
ness: 5 °fH

General washing behaviour on a HA washing machine

Washparameters
in accordance to IEC
60456: 5 kg load,
3 g/l detergent
(25 °fH), resp. 2 g/l
detergent (5 °fH)

Article 124/1 is sensitive to the temperature, to the water hardness and slightly to the amount of detergent. It is nearly insensitive to bleaching agents and to enzymes.
